EXECUTIVE SUMMARY

Why Tokenomics Matters

Cubert Coin's tokenomics were designed with one priority: **trust before hype**. Every decision — from supply to allocation — reflects a commitment to liquidity, transparency, and sustainable growth. We built the economics of \$CUBE to earn confidence from day one.

TOKEN ALLOCATION

How the Supply is Distributed

Liquidity Pool — 70%

Prioritized to maximize market confidence and provide healthy liquidity from launch.

Treasury — 15%

Funds development, marketing, partnerships, and long-term operations.

Community Growth — 10%

Reserved for airdrops, incentives, and community-driven initiatives.

Team — 5%

Subject to vesting, aligning team incentives with long-term success.

Utility That Grows With Us

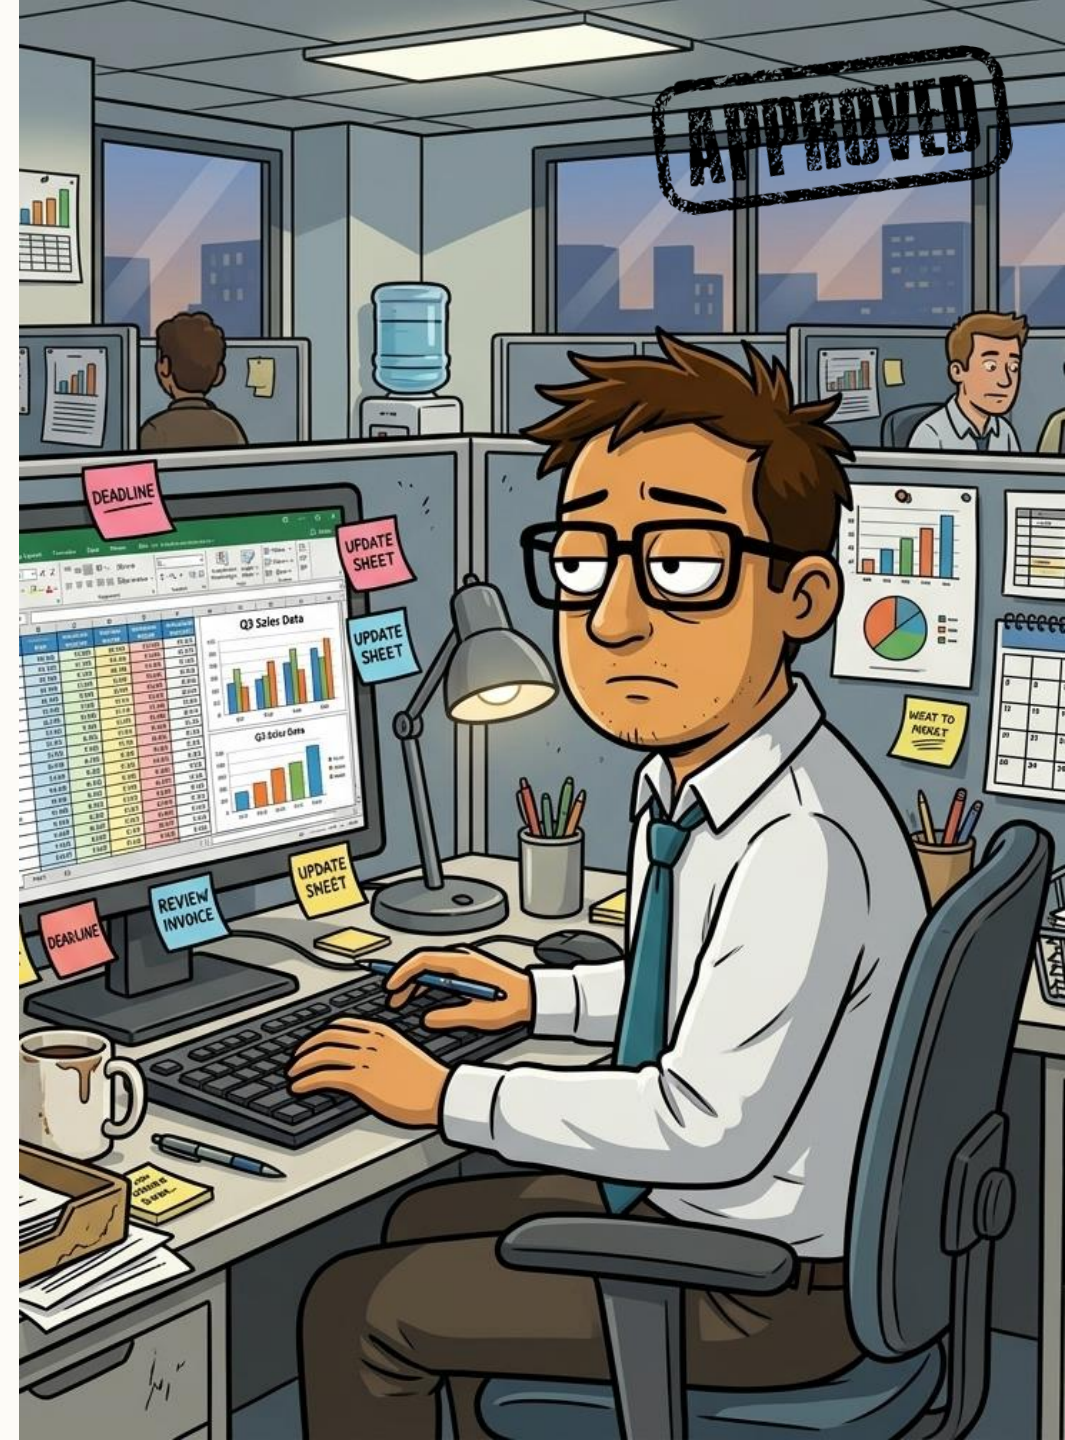

Today

- Community participation and engagement
- Eligibility for future community rewards
- Eligibility for future airdrops for early supporters

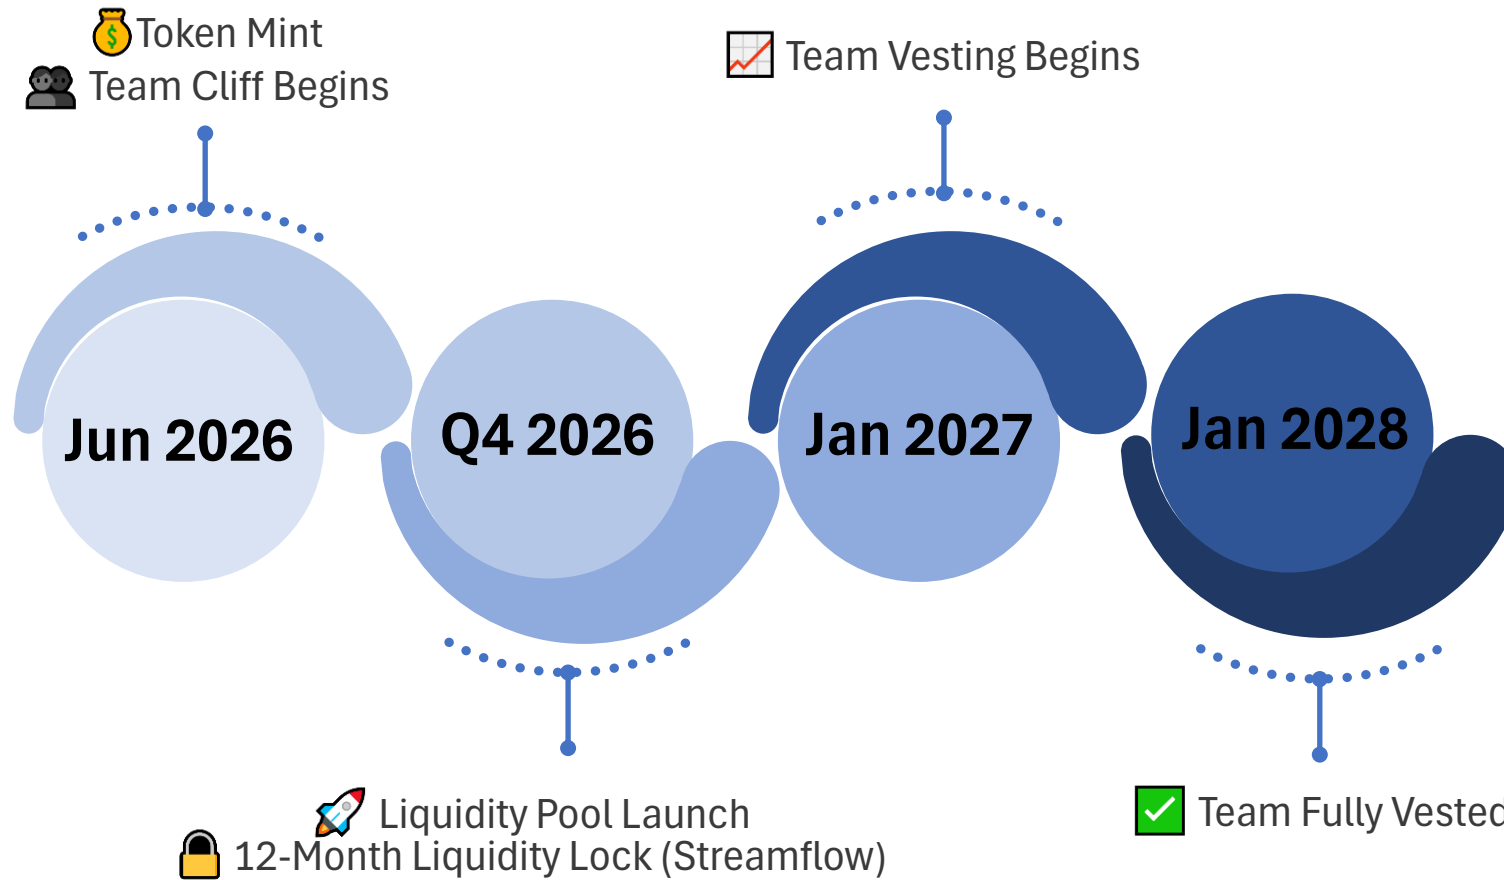

Tomorrow

- Community campaigns and meme contests
- Burnout Calculator ecosystem integrations
- Access to Employee Portal features
- Governance participation
- Future Cubert ecosystem access

Utility will expand alongside ecosystem development.

Designed for Sustainable Growth

Note: Launch dates are indicative and may be adjusted based on development progress and market conditions. Vesting and liquidity lock durations remain unchanged once activated.

OUR COMMITMENT

Building for the Long Run

Cubert Coin was designed with one objective:

Build trust before hype.

Proof of Burnout

Transparent, long-term alignment, verifiable and community first.

Security Scan

Audit & Security Notice: A formal smart contract audit is planned following the public launch. Current RugCheck results are primarily impacted by the fact that the liquidity pool has not yet been deployed. The security score is expected to improve once liquidity is launched, locked, and the token ecosystem becomes fully operational
